Subject: **DATA ADEQUACY RECOMMENDATION FOR THE PICO POWER PLANT PROJECT - (02-AFC-3)**

Staff has completed its data adequacy review of the City of Santa Clara's Pico Power Plant Project Application for Certification (AFC) submitted on October 7, 2002. Staff believes that the AFC does not contain all the information required by Cal. Code of Regs., tit. 20, § 1704, Appendix B (12-month process) and Public Resources Code 25550 (6-month process). Attachment A contains an overview of each technical discipline and staff's adequacy recommendation. There are three technical areas in the 12-month process and three technical areas in the 6-month process requiring additional information. Attachment B contains the individual data adequacy worksheets detailing staff's conclusions for each technical section.

Though Staff still needs additional information to make a final determination on data adequacy, the project appears to be generally free of any significant issues that would prevent it from meeting the criteria set forth under the 6-month process. Staff still requires additional information in three general areas to make a determination that all issues can be resolved in a 6-month AFC review process. These issues include: 1) Air Quality (the Bay Area Air Quality Management District has not yet accepted the Pico Power Project air quality permit application as complete, though the District has given assurances that the application may be determined as complete as early as November 11; Staff also needs a few minor details from the Applicant concerning the proposed mitigation for the project); 2) Biological Resources (additional information is needed concerning potential impacts to the Bay Area checker-spot butterfly from nitrogen deposition on serpentine soils); and 3) Water Resources (additional information is required from the Applicant concerning the project's compliance with applicable laws, ordinances, regulations and standards).

Based on Staff's current recommendation, I would recommend that the Energy Commission find the AFC incomplete at the Energy Commission's Business Meeting on November 20, 2002, and recommend that you adopt the list of deficiencies contained in the attachment. However, Staff is still working with the Applicant to resolve remaining data adequacy issues, and Staff believes that before the November 20 Business Meeting, the Applicant and the Air District will likely be able to provide all needed information for Staff to be able to determine that the project is data adequate for both the 6-month and 12-month AFC-review process, and I will revise my recommendation accordingly.

If you have any questions, please call Matt Trask, staff's Project Manager, at (916) 654-4067.

Sincerely,

STEVE LARSON
Executive Director
